

## MCX CONSTRUCTION PROJECT

### *What You Should Know*

- The MCX is adding 15,000 square feet of retail space on the first and second floors.
- Many departments will be moved to new locations and the interior will be refurbished to provide wider, ADA-compliant aisles and a fresh, new look. “From curb to register,” we intend to show you an enhanced shopping experience.
- When the newly-added space is completed, we will begin refurbishing starting on the third floor. As each floor is refurbished, we will move departments into their new homes.
- We are adding a Java Café, serving Starbucks coffee as well as breakfast and lunch items—salads, sandwiches, and assorted hot and cold beverages. The Uniform Shop, temporarily located on the PT field, will move into the third floor by the new firearms department.
- A parking area will be located near The Vineyard for easier access and more convenient loading of your purchases.
- Our MCX will get a new “front door” matching stores around the Corps. Our MCX brand—Core Brands, Corps Value—will be visibly identifiable to Marines wherever they serve around the globe.
- Some parking for patrons with handicapped parking privileges will remain in front of the store; additional spaces have been added on the first deck of the parking garage on the right side as soon as you enter. There are also handicapped parking spaces on the top deck of the parking garage near the breezeway entrance, where the ATM will be temporarily relocated.
- Though this project is disruptive and inconvenient, we trust that when it’s completed your shopping experience will be outstanding. There is a Marine Corps saying that applies: “Pain is Temporary—Pride is Forever!”
- Thank you for making your Henderson Hall MCX one of the highest-rated exchanges in the Corps. We look forward to seeing you at our grand re-opening in early fall 2011.
